Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Texas Department of Insurance (“TDI” or “Insurance Department”).

The TDI recognizes only statutory accounting practices ("SAP") prescribed or permitted by the State of Texas for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Texas Insurance Law. The National Association of Insurance Commissioners' ("NAIC") *Accounting Practices and Procedures manual* ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of Texas.

The Company is no longer applying several accounting practices prescribed by the Iowa Department of Commerce, Insurance Division (“IID”). This includes *Iowa Administrative Code 191 - Chapter 97, Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve* ("IAC 191-97"). The removal of IAC 191-97 means the Company will record call option derivative instruments at fair value with changes in fair value recorded as net unrealized capital gains or losses. The indexed annuity reserves will also reflect the market value of call options associated with the current index based on observable inputs for such options. This change in accounting practice is effective retroactively to July 1, 2026.

The net effect of removing this prescribed practice resulted in a one-time increase of $176,127,447 to surplus and is reflected in the Statement of Capital and Surplus as a cumulative effect of changes in accounting principles.

The Company is also no longer applying *Iowa Administrative Code 191 - Chapter 43 Annuity Mortality Tables For Use In Determining Reserve Liabilities for Annuities* (“IAC 191-43”) which allowed the use of the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. This change in accounting practice is effective retroactively to July 1, 2026. The net effect of removing this prescribed practice resulted in a one-time decrease of $7,732,007 to surplus and is reflected in the Statement of Capital and Surplus as a cumulative effect of changes in accounting principles.

The Company has now fully implemented Actuarial Guideline 33 for business issued prior to January 1, 2019. This resulted in a one-time decrease of $5,717,884 to surplus and is reflected in the Statement of Capital and Surplus as a correction of error within aggregate write-ins for gains and losses in surplus.

The changes to accounting policies noted above were applied at Eagle Life Insurance Company (‘Eagle Life’) as well, resulting in a one-time decrease of $1,580,877 to surplus reflected in Eagle Life’s Statement of Capital and Surplus as a cumulative change in accounting principle. This decreases the Company’s investment in the affiliated common stock of Eagle Life.

A reconciliation of the Company’s net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Insurance Department is shown below:

B. Use of Estimates in the Preparation of the Financial Statements - No Significant Changes

C. Accounting Policy

(1) Short-term investments - No Significant Changes

Notes to the Financial Statements

1. Summary of Significant Accounting Policies and Going Concern (Continued)

(2) Investments in bonds rated NAIC 1-5 (including loan-backed securities), are reported at cost adjusted for amortization of premiums or discounts. Bonds with NAIC 6 ratings are reported at the lower of amortized cost or fair value. Amortization is computed using methods which result in a level yield over the life of the security. The Company reviews its prepayment assumptions on mortgage and other asset-backed securities at regular intervals and adjusts amortization rates retrospectively when such assumptions are changed due to experience and/or expected future patterns. Realized capital gains and losses are recorded on the trade date and determined on the basis of specific identification and are recorded net of related federal income taxes and amounts transferred to the Interest Maintenance Reserve ("IMR"). Under a formula prescribed by the NAIC, the Company defers, in the IMR, the portion of realized gains and losses on sales of fixed income investments, principally bonds, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity of the security. Pursuant to NAIC guidance INT 23-01, net negative (disallowed) IMR may be reported as an admitted asset by the reporting entity, subject to a limitation of 10% of the reporting entity's adjusted general account capital and surplus. The Asset Valuation Reserve ("AVR") is established by the Company to provide for anticipated losses in the event of default by issuers of certain invested assets. The AVR is determined using a formula that is intended to establish a reserve to offset potential credit-related investment losses. The carrying values of all investments are reviewed on an ongoing basis for credit deterioration. An other than temporary impairment shall be considered to have occurred if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of a debt security in effect at the date of acquisition. If this review indicates a decline in fair value that is other than temporary, the carrying amount of the investment, other than loan-backed and structured securities, is reduced to its fair value and a specific other than temporary impairment is taken. A decline in fair value which is other than temporary includes situations where the Company has made a decision to sell a security prior to its maturity at an amount below its carrying value. Such reductions in carrying values are recognized as realized losses on investments.

(3) Common stocks - No Significant Changes

(4) Preferred stocks - No Significant Changes

(5) Mortgage loans - No Significant Changes

(6) Asset-backed securities are stated at either amortized cost or, when the NAIC rating is a 6, at the lower of amortized cost or fair market value. The retrospective adjustment method is used to value asset-backed securities that are of high credit quality. The prospective adjustment method is used to value asset-backed securities that are not of high credit quality.

(7) Investments in subsidiaries, controlled and affiliated entities - No Significant Changes

(8) Investments in joint ventures, partnerships and limited liability entities - No Significant Changes

(9) Effective July 1, 2026, the Company is no longer applying the accounting practice prescribed by IAC 191-97 for call option derivative instruments that hedge the growth in interest credited on fixed index products. As such the derivatives are no longer accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income and instead are recorded at fair value with adjustments in fair value flowing through unrealized capital gain or loss in surplus. See Note 1A for more information about the impact of this change.

(10) Investment income as a factor in the premium deficiency calculation - No Significant Changes

(11) Liabilities for losses and loss/claim adjustment expenses - No Significant Changes

(12) During the first quarter 2026, the Company modified its capitalization policy for multiple classes of fixed assets as well as prepaid assets. The updated policy calls for capitalization of capital assets, building improvements, and leasehold improvements greater than $100,000 (previously $25,000), and software greater than $250,000 (previously $100,000). The policy also formally calls for capitalization of prepaid assets greater than $100,000, which aligns with previous, informal accounting guidelines. No changes were made to assumptions for depreciable lives of these fixed assets or the amortization period for prepaid assets.

(13) Pharmaceutical rebate receivables - None

D. Going Concern

The Company's management has evaluated its ability to continue as a going concern and does not have substantial doubt the entity will continue as a going concern.

2. Accounting Changes and Corrections of Errors

The company removed alternative accounting practices for IAC 191-97, IAC 191-43, and AG-33 as described in Note 1A. The AG-33 update has been recorded as a correction of error retroactively to July 1, 2026, with no adjustment to prior periods. The net impact is $5,717,884 reflected in the Statement of Capital and Surplus as a correction of error within aggregate write-ins for gains and losses in surplus. The accounting for AG-33 in prior periods was in accordance with the Company's domiciliary regulator at the time. Upon re-domestication to Texas, the Company was directed to fully implement AG-33 and account for the acceleration as an error.

3. Business Combinations and Goodwill - None

4. Discontinued Operations - None

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans - No Significant Changes

C. Reverse Mortgages - None

D. Asset-Backed Securities

(1) Prepayment assumptions for loan-backed securities were obtained from third party rating agencies and/or third party loan servicers.

Notes to the Financial Statements

5. Investments (Continued)

(2) Asset-backed securities with a recognized other-than-temporary impairment (OTTI)

For the nine months ended September 30, 2026, the Company recognized other than temporary impairments ("OTTI") on the basis of intent to sell and on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient enough to cover the amortized cost basis.

(3) Securities held that were other-than-temporarily impaired due to the present value of cash flows expected to be collected was less than the amortized cost of securities

The following table lists the asset-backed securities held by the Company at September 30, 2026 for which the present value of cash flows expected to be collected was less than amortized cost, and, as a result, OTTI was recorded during the nine months ended September 30, 2026:

Total			$ 6,483,151			

Total OTTI recognized under SSAP 43R for the nine months ended September 30, 2026 was $6,483,151.

(4) All impaired securities for which an OTTI has not been recognized in earnings as a realized loss

For asset-backed and structured securities with unrealized losses as of September 30, 2026, the gross unrealized losses and fair value, aggregated by length of time that individual securities have been in a continuous unrealized loss position, are summarized as follows:

a. The aggregate amount of unrealized losses:
   1. Less than 12 months $ 93,840,319
   2. 12 months or longer 452,479,429

b. The aggregate related fair value of securities with unrealized losses:
   1. Less than 12 months $ 4,185,336,089
   2. 12 months or longer 3,224,564,407

(5) The process for evaluating asset-backed securities is based on a number of factors. The primary consideration in the evaluation process is the issuer's ability to meet current and future interest and principal payments as contractually stated at the time of purchase. The review of these securities includes an analysis of the cash flow modeling under various default scenarios considering independent third-party benchmarks, the seniority of the specific tranche within the structure of the security, the composition of the collateral and the actual default, loss severity, and prepayment experience exhibited. With the input of third-party assumptions for default projections, loss severity and prepayment expectations, the Company evaluates the cash flow projections to determine whether the security is performing in accordance with its contractual obligations.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions - None

F. Repurchase Agreements Transactions Accounted for as Secured Borrowing - None

G. Reverse Repurchase Agreements Transactions Accounted for as Secured Borrowing

(1) Information regarding the company policy or strategies for engaging in repo programs, policy for requiring collateral

Included in short-term investments are amounts receivable under reverse repurchase agreements, which involves the purchase of investments from a seller with the agreement that the investments will be repurchased by the seller at a specified price, and at a specified date or within a specified period of time. The investments purchased, which represent collateral on a secured lending arrangement, are not reflected in the Company's balance sheets. Instead, the secured lending arrangement is reflected as a short-term investment for the principal amount loaned under the agreement.

F. All Other Contingencies

The Company is occasionally involved in litigation, both as a defendant and as a plaintiff. In addition, state regulatory bodies, such as state insurance departments, the Securities and Exchange Commission, the Department of Labor, and other regulatory bodies regularly make inquiries and conduct examinations or investigations concerning its compliance with, among other things, insurance laws, securities laws, and the Employee Retirement Income Security Act of 1974, as amended.

In accordance with applicable accounting guidelines, the Company will establish an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter is developing, the Company, in conjunction with outside counsel, evaluates on an ongoing basis whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure. There can be no assurance that any pending or future litigation will not have a material adverse effect on its business, financial condition, or results of operations.

(3) Transfers of securities among the levels occur at times and depend on the type of inputs used to determine fair value of each security.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

(4) Fair value is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The objective of a fair value measurement is to determine that price for each financial instrument at each measurement date. The Company met this objective using various methods of valuation that include market, income and cost approaches.

The Company categorizes its financial instruments into three levels of fair value hierarchy based on the priority of inputs used in determining fair value. The hierarchy defines the highest priority inputs (Level 1) as quoted prices in active markets for identical assets or liabilities. The lowest priority inputs (Level 3) are the Company's assumptions about what a market participant would use in determining fair value such as estimated future cash flows. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. The Company categorizes its financial assets and liabilities recorded at fair value in the consolidated balance sheets as follows:

- Level 1 - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The Company does not adjust the quoted price for these financial instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.
- Level 2 - Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active; and models and other valuation methodologies using inputs other than quoted prices that are observable.
- Level 3 - Models and other valuation methodologies using significant inputs that are unobservable for financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. Financial instruments that are included in Level 3 are securities for which no market activity or data exists and for which the Company used discounted expected future cash flows with its own assumptions about what a market participant would use in determining fair value.

(5) Options and Foreign exchange forwards are categorized as Level 2 and are valued using observable market inputs, including forward currency exchange rates.

B. Other Fair Value Disclosures - None

C. Fair Values or NAV for All Financial Instruments

The following table represents the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries and joint ventures). The fair values are also categorized into the three level fair value hierarchy.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	Level 1	Level 2	Level 3	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Assets: Bonds-ICO	$ 26,066,420,862	$ 30,350,565,451	$ 284,724,266	$ 24,512,147,744	$ 1,269,548,852	$	$
Assets: Bonds-ABS	11,756,004,480	12,255,407,268		3,864,452,401	7,891,552,079		
Assets: Preferred Stock	572,443,425	573,382,371		2,725,982	569,717,443		
Assets: Common Stock - Unaffiliated	11,222,127	11,222,127		10,000,000	1,222,127		
Assets: Policy Loans		755,618					755,618
Assets: Other Invested Assets	2,007,881,604	1,993,930,650		331,793,724	1,676,087,880		
Assets: Cash And Cash Equivalents	3,391,489,985	3,391,489,985	3,391,489,985				
Assets: Derivative Instruments	1,133,267,338	1,133,267,338		1,133,267,338			
Assets: Short-Term Investments	21,509,492	21,532,808		21,509,492			
Assets: Real Estate	52,281,844	43,290,536			52,281,844		
Assets: Mortgage Loans	7,352,111,311	7,841,915,847			7,352,111,311		
Liabilities: Deposit Type Contracts	95,461,859	135,049,187			95,461,859		

The following methods and assumptions were used by the Company in estimating the fair values of financial instruments.

- Bonds: The fair values of bonds are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.
- Preferred and common stock: The fair values of preferred and common stocks are based on quoted market prices.
- Mortgage loans: The fair values of mortgage loans are calculated using discounted expected cash flows using current competitive market interest rates currently being offered for similar loans.
- Real estate: The fair values of real estate investments are based on either market quotes or third-party appraisals. An appraisal is used to estimate the fair value based on relevant data in the market. An appraisal is expected to be obtained at least once every five years and sooner if changes in market conditions indicate there has been a significant decrease in the fair value of the property.
- Derivatives: The fair values of the Company's derivatives are based upon the amount of cash the Company will receive to settle each derivative instrument. The fair values of derivative instruments, primarily call options, are based upon the amount of cash that we will receive to settle each derivative instrument on the reporting date. These amounts are determined by our investment team using industry accepted valuation models. Inputs include market volatility and risk-free interest rates and are used in income valuation techniques in arriving at a fair value for each option contract. Foreign exchange forwards are valued using observable market inputs, including forward currency exchange rates.

Notes to the Financial Statements

20. Fair Value Measurements (Continued)

- Policy loans: The Company has not attempted to determine the fair values associated with its policy loans as management believes any differences between the Company's carrying value and the fair values afforded these instruments are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure is not worth the benefit to be derived.
- Other invested assets: The fair values of other invested assets are obtained from third parties and are based on quoted market prices when available. When quoted market prices are not available, the fair values are determined by calculating the present value of future cash flows discounted by a risk-free rate, a risk spread and a liquidity discount.
- Cash, cash equivalents, and short-term investments: Amounts reported in the statutory-basis balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.
- Deposit-Type Contracts: The fair values of the supplemental contract liabilities are stated at the cost the Company would incur to extinguish the liability (i.e., the cash surrender value). The accrued account balance consists of deposits, net of withdrawals, plus or minus interest credited, fees and charges assessed and other adjustments.

D. Not Practicable to Estimate Fair Value

The following table shows the type of financial instrument the Company has determined it is not practicable to estimate the fair value.

Type or Class of Financial Instrument	Carrying Value	Effective Interest Rate	Maturity Date	Explanation
Policy Loans	$ 755,618	%		1

Explanations
1: The Company believes any differences between carrying values and fair values are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure does not justify the benefit to be derived.

c. The insurer has an actual expectation of ultimate payment of all contracted interest and principal.

Has the reporting entity self-designated 5GI securities? ..... Yes [X] No [ ]

GENERAL INTERROGATORIES

19. By self-designating PLGI securities, the reporting entity is certifying its compliance with the requirements as specified in the Purposes and Procedures Manual of the NAIC Investment Analysis Office (P&P Manual) for private letter rating (PLR) securities and the following elements of each self-designated PLGI security:
    a. The security was either:
        i. issued prior to January 1, 2018 (which is exempt from PLR filing requirements pursuant to the P&P Manual), or
        ii. issued from January 1, 2018 to December 31, 2021 and subject to a confidentiality agreement executed prior to January 1, 2022 which confidentiality agreement remains in force, for which an insurance company cannot provide a copy of a private letter rating rationale report to the SVO due to confidentiality or other contractual reasons (“waived submission PLR securities”).
    b. The reporting entity is holding capital commensurate with the NAIC Designation and NAIC Designation Category reported for the security.
    c. The NAIC Designation and NAIC Designation Category were derived from the credit rating assigned by an NAIC CRP in its legal capacity as a NRSRO which is shown on a current private letter rating, dated during the financial statement year, held by the insurer and available for examination by state insurance regulators.
    d. Other than for waived submission PLR securities, defined above, on or after January 1, 2024 for any PLR securities issued on or after January 1, 2022, if the reporting entity is not permitted to share this private credit rating or the private rating letter rationale report of the PL security with the SVO, it certifies that it is reporting it as an NAIC 5.B GI and may not assign any other self-designation.

    Has the reporting entity self-designated PLGI to securities, all of which meet the above requirement and as specified in the P&P Manual? ..... Yes [ ] No [X]
